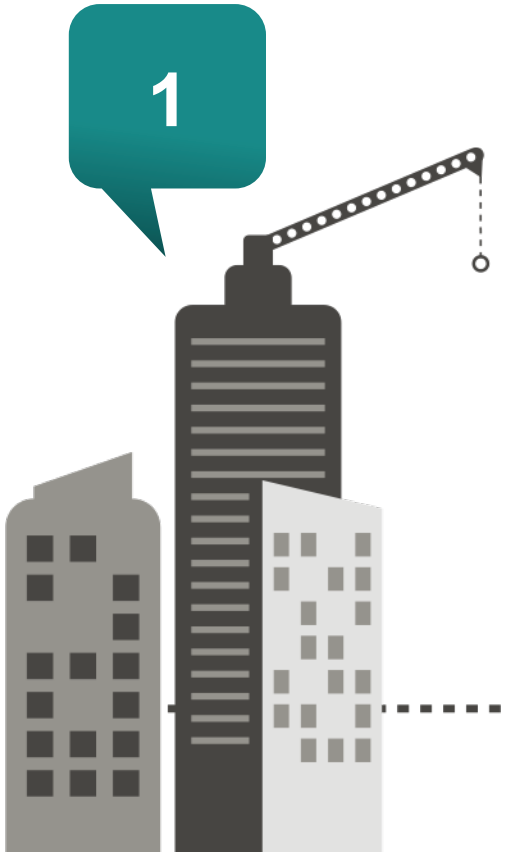
CONSTRUCTION BUSINESS OWNER WEBINAR

THE THEME: TECHNOLOGY ENABLES EFFICIENCY

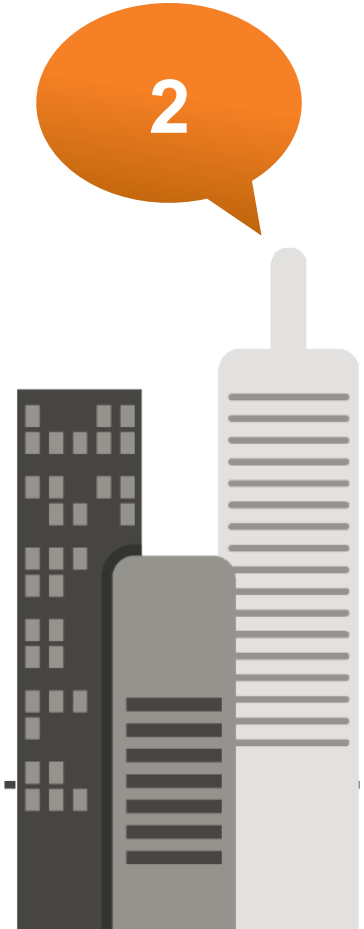
Top 7 Technology Trends to Watch



Consumerization of Technology

+ The end users are gaining influence.
+ Living in a multiple device world—software will adopt or die.

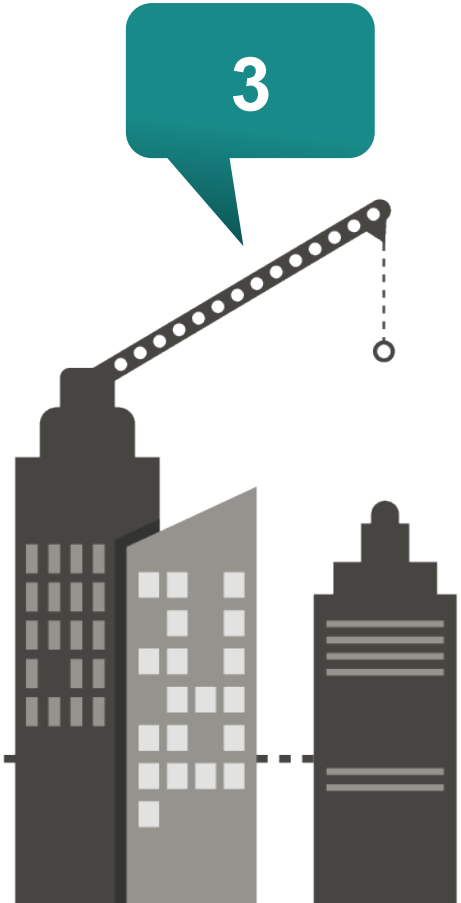
2018 GOAL: Look at your tech from the perspective of your client, including their devices.



Data is King

+ Analog process will be phased out.
+ Data will provide new insights and knowledge to drive better decision making.

2018 GOAL: Use the data your company has collected to make more savvy business decisions.



APIs / Integrations are the New All-in-One System

+ Best of Breed solutions will continue to rise.
+ More flexibility and options than ever before.
+ All the same benefits with much fewer costs.

2018 GOAL: Find the vendor in your stack that believes in an open environment and has off the shelf integrations.

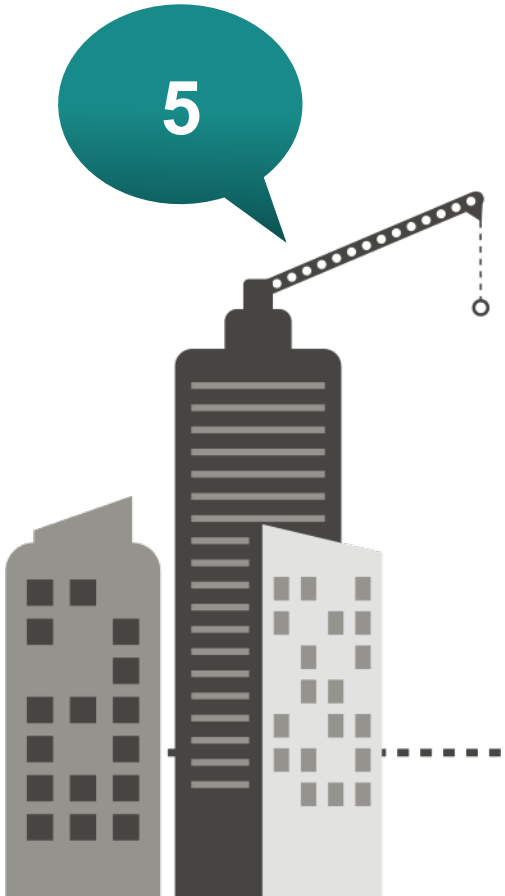
IoT

+ Saves time and enables information flows that were never before possible.
+ Revolutionizes health and safety.

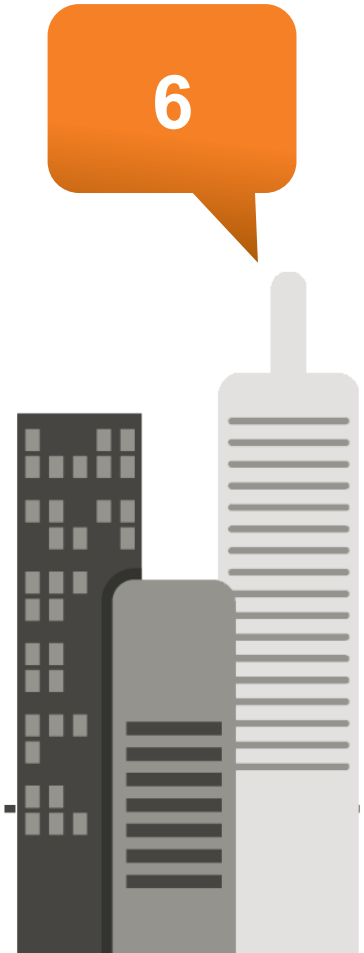
2018 GOAL: Structure information flows to maximize connectivity.



Augmented Reality (AR) / Virtual Reality (VR)

+ Use cases have started to surface.
+ Possibilities are endless, and have started to be implemented.

2018 GOAL: Start learning now as AR / VR will become more prevalent in the industry.

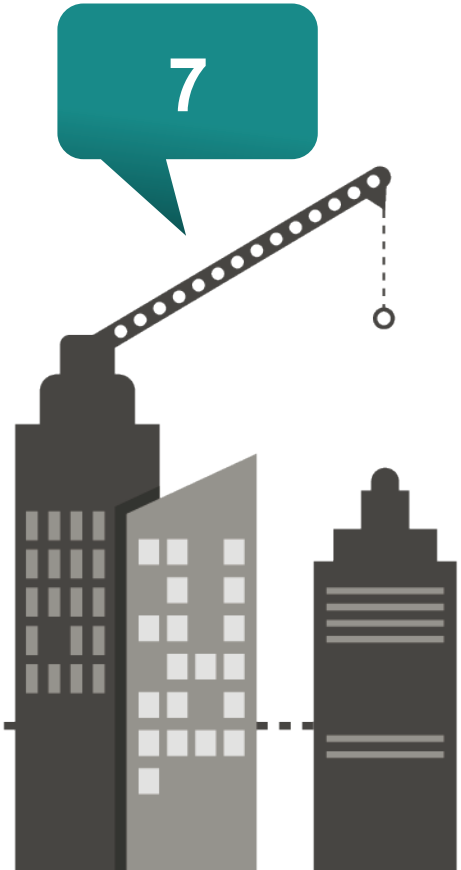


Convergence of 2-D and 3-D

+ Model is finding its way to the field.
+ Real time as-builts will forever change.

2018 GOAL: Find a 3D model that works for the field team.

AI / Predictive Analytics



+ Evolution from prescriptive to predictive will start simple but grow over the next decade.

2018 GOAL: Be on the lookout for more predictive analytics appearing.

Tech trends move toward end-to-end digital investments
